

Everest MAX

For Those Who Wish to Improve the Living Comfort

Everest Max is the choice of those who are after comfort and insulation without overstraining the budget!

Everest MAX

With the Everest Max product range, it is possible to maintain perfect insulation, comfort and elegance without overstraining the budgets.

Everest Max System is 60 mm wide and designed with 4 chambers and 2 gaskets. Use of TPE gaskets has the advantage of seals on the corners and thus provides a perfect insulation.

System has a wide range of products with 90 mm and 150 mm sash profiles, expansion and interconnecting profiles, angular corners, 90° and 135° angle corners, drain boards, aluminium threshold, various finishing profiles and recess profiles. Optimizing and minimizing the height of door sash and outward opening door sash, area of glass surface, in other words maximize viewing area. Everest Max System has different profile options, such as Everest Max frame, architrave frame and image frame (L54) that may generate solutions for different details.

Everest Max System has a unique design that speeds up the water drainage. The system enables fast production of special window styles such as folded, parallel sliding, outward-opening windows. Latch lock systems that are recommended for safety are applicable within the system. Everest Max System is compatible with all other systems (Fly screen, blinds, shutters, etc.).

Profiles in Everest Max System are in compliance with TS 5358 EN 12608 standards.
